

THE BALANCE OF CATEGORIES OF AGRICULTURAL HERITAGE SYSTEMS

Prof. Liu Hongying

June 14, 2016

Korea

FOREWORD

Agricultural heritage systems will not be able to play a catalytic role for sustainable development in their region if it's imbalance between the types.

1 THE UNIVERSAL VALUE AND CATEGORIES OF AGRICULTURAL HERITAGE

- Traditional agriculture systems are still providing food for some two billion people today. They also sustain biodiversity, livelihoods, practical knowledge and culture.
- According to FAO, this global agricultural heritage needs to be recognized and supported in ways that allow it to continue evolving and provisioning goods and services for the present and future generations.

HOW DOES THE DIVERSITY OF "SYSTEMS" REALIZE ?

2 THE BALANCE OF CATEGORIES AND THE TARGET PATTERNS OF AGRICULTURAL HERITAGE

The concept of agriculture heritage is a broad sense.

- Farming
- Forestry
- Animal husbandry
- Fishing
- Hunting

FAO'S TYPES

- Mountain rice terrace agro-ecosystems.
- Multiple cropping/polyculture farming systems.
- Understory farming systems.
- Nomadic and semi-nomadic pastoral systems.
- Ancient irrigation, soil and water management systems.

FAO'S TYPES

- Complex multi-layered home gardens.
- Below sea level systems.
- Tribal agricultural heritage systems.
- High-value crop and spice systems.
- Hunting-gathering systems.

3 THE COMPLEXITY FROM THE BALANCE OF CATEGORIES AND POSSIBLE PROBLEMS

Challenging Task

FOR EXAMPLE

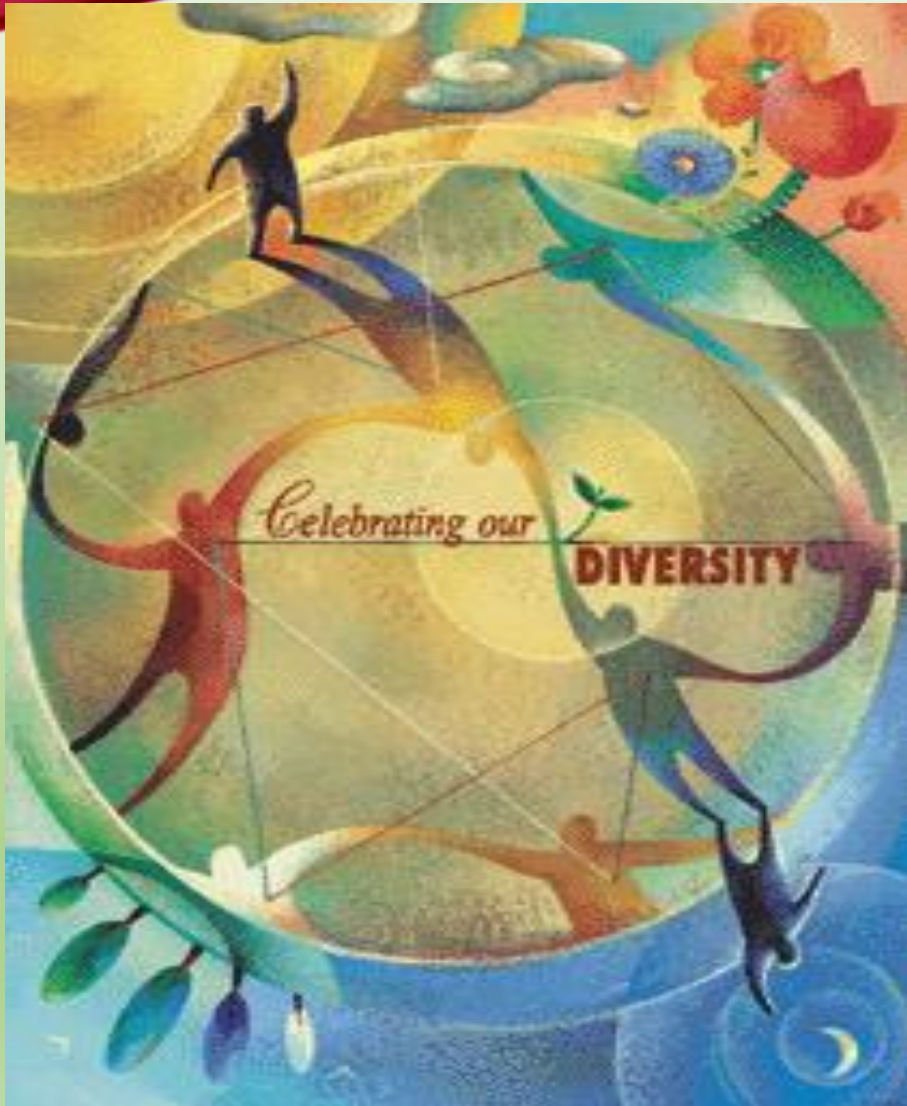

- The repetition rate is higher.
- The homogeneity is obvious.

FOR EXAMPLE

- High-value crop projects.
- Focusing on the commercial results.

POLICY

- Equilibrium
- Typicality

4 ACHIEVING THE BALANCE OF CATEGORIES IN AGRICULTURAL HERITAGE VALUES

GIAHS is distinct from, and more complex than, a conventional heritage site.

BY LEGAL SYSTEM

- Emphasis on cultural ecology and natural ecology indivisible oneness.
- Find the right path to the future of mankind.

감사합니다.
